The Advantage: Proven Designs - Fully Customized - Unmatched Experience

Profile

Servolift's universal drum clamping system is the cleanest, strongest and most reliable drum dumping system available on the market. The system works by pressing the drum into a fixed funnel forming an airtight seal for dust-free, ergonomic transfer of the drum's products. True to its name, the system can handle any drum type or size for total flexibility.

As with all Servolifts we customize each system to meet your particular application.

Typical Applications (loading):

- Tablet Presses
- Encapsulators
- Mixing tanks
- Reactors/compounding tanks
- Mills
- High Shear Granulators
- Fluid Bed Processors

FEATURES:

- Available in manually pushed and self propelled versions
- With battery, pneumatic or plug-in electric power
- Single stage or telescopic lifting columns
- Cleanest drum clamping system in the industry
- Funnel and valve quick-connect to lifter without tools
- Designed for all drum types: Fiber, plastic and steel
- Exceeds FDA and USDA requirements for GMP
- Explosion proofing for all dust and solvent atmospheres
- Lift height, overhang, outrigger size and all other specifications all customized to your needs

We offer the cleanest and smallest clamping system in the industry
