

## Sanitary Pallet Jack with integrated weighing system and touch PC

The weighing system features an integrated, Microsoft based touchscreen PC, which allows an effective consignment and weighing on incoming goods, despatch areas and warehouses. It is also applicable for refrigerated areas of the food processing industry.

The recorded operating data can be transferred directly to the ERP system via the integrated WLAN connection. Peripheral equipment can be connected easily via the various ports.

- Hydraulics with user-friendly soft-damping and fast lift mechanism.
- Rotatable housing with powerful rechargeable battery.
- With serial impact protection of weighing cells.
- Sanitary design complete executed in electro-polished 304 stainless steel
- Not suitable for Ex-zones.

### Specification:

|                     |   |
|---------------------|---|
| Dimensions:         | 46.8" L X 21.25" W or 26.7" W x 47.24" H              |
| Minimum Height:     | 3.54"   |
| Maximum height:     | 7.87"   |
| Weighing range:     | 10-2000 kg / 22-4400 lbs                              |
| Resolution:         | As required   |
| Duration of charge: | Rechargeable battery: approx. 40 h constant operation |
| Charging device:    | Multilevel with charge conservation                   |
| Weight:             | approx. 195 kg  |

### Available Options:

Pedal for locking brake, replacement battery, FDA quality oil, capable of being approved-for-trade, special dimensions
